# why Liberty?

## Symmetrical force of power

### Our All-Wheel Drive philosophy

Greater balance and control. That's the confidence you get from our unique Symmetrical All-Wheel Drive System, which delivers the drive distribution to all four wheels, all the time. Every Subaru Liberty has an innate sense of balance from the ground up, thanks to a near perfect symmetrical layout.

## Boxing clever

### Our famous Subaru Boxer engine

While most engines stand vertically, ours lay flat. The famous Subaru Boxer engine delivers handling like no other engine can. Sitting horizontally in the engine bay, it moves like a boxer's fists with a punch and counterpunch action. Lightweight, low and flat, it makes for perfect balance and a much lower centre of gravity. It creates less noise and vibration too. All of this means better on-road handling for you. More stability. More performance. More fun. And a more confident drive.

## DataDotDNA®

Every Subaru is fitted with advanced engine immobilisers and the DataDotDNA®<sup>1</sup> Theft Deterrent System. Microscopic dots are laser-etched with each vehicle's unique Vehicle Identification Number – making it a less attractive target for thieves.

### Three Year Rebate on Theft Insurance Excess

DataDot Technology (Australia) Pty Ltd will pay your theft insurance excess<sup>2</sup> (up to a maximum of \$800 including GST) should your new Subaru be stolen and not recovered within 45 days despite the presence of DataDotDNA® and warning labels.

## Finest safety

### 5 star ANCAP safety across the range

With spirit, quality and imagination comes some serious safety innovation. We want every Subaru to be amongst the safest cars on the road. Engineered full of cutting-edge technologies and the most intelligent design features. It's not a Subaru unless it carries the maximum 5 star ANCAP<sup>3</sup> safety rating.

## Eyes in the back of your head

### Rear view reverse camera

Manoeuvring back into a tight side street? Family driveway littered with toys? Reverse with confidence, thanks to our rear view reverse camera technology. The rear view reverse camera is like having eyes in the back of your head. This greatly improves your visibility and reduces the risk of bumps and scrapes. A rear view reverse camera is standard on every Liberty variant.

## Efficiency without compromise

### Auto Stop Start

We're constantly thinking of ways to help the environment and become more fuel-efficient. That's why we developed Auto Stop Start technology. It saves fuel by immediately cutting the engine when you don't need it, like when you're idling or stopped in heavy traffic. The moment you're ready to move again, the engine restarts in a fraction of a second. Our Auto Stop Start technology is standard on Liberty 2.5i and 2.5i Premium variants.

## Yet another world first

### Lineartronic™ CVT

Pushing innovation beyond the bounds, we introduced an automatic transmission called Lineartronic™ CVT (Continuously Variable Transmission). And it's the reason our automatic models drive so smooth. It's the world's first longitudinally mounted system for AWD vehicles. Unlike a conventional automatic transmission – which uses fixed gear ratios – our Lineartronic™ CVT provides infinite variability between the highest and lowest available ratios. So you now experience a smoothness that also optimises the efficiency of the vehicle. For even more excitement, switch to manual mode for greater control to suit your driving style. Lineartronic™ CVT is standard on all Liberty variants.

## Intelligently driven

### Subaru Intelligent Drive

Heading to the shops? Taking on the Great Ocean Road? Each situation deserves a distinctive driving mode, so we crafted Subaru Intelligent Drive (SI-Drive) technology, available on all Liberty variants, to do just that. Switch from smart, to sporty to even sportier. Intelligent (I) mode – perfect for everyday driving, Sport (S) mode – for enhanced acceleration and all-round sporty performance and on the Liberty 3.6R, Sport Sharp (S#) mode – for a truly thrilling drive.

## We're looking out for you

### EyeSight® Driver Assist

We were the first car company to exclusively use stereo camera technology to detect objects in our vehicles path. A sign of our future-thinking and our commitment to quality, technology and safety, EyeSight® Driver Assist is like your second pair of eyes, spotting potentially dangerous situations. If EyeSight®

detects certain hazards that might be of danger, it warns you audibly, urging you to take action and brake. EyeSight® is standard on all Liberty variants and now includes a new Lane Keep Assist feature as part of its suite of technologies.

## Clever thinking

### Vision Assist

Imagine if your wing mirrors could alert you when there's something in your blind spot. Or if your high beams could automatically switch to low beam, when approaching oncoming traffic at night. We made all this happen - and more - with Subaru's Vision Assist.

Our suite of proactive safety technologies including Adaptive Driving Beam, Blind Spot Monitor, Front View Monitor, Lane Change Assist, Rear Cross Traffic Alert and Side View Monitor are always at work to help you feel safer on the road. Subaru's Vision Assist technologies are standard on the Subaru Liberty 2.5i Premium and 3.6R.

1. DataDotDNA® is a theft deterrent not a theft prevention mechanism. 2. Vehicles must be registered, comprehensively insured and less than 3 years old. DTA must receive a claim within 45 days of the theft. Terms and conditions apply. 3. The Australasian New Car Assessment Program (ANCAP) gives consumers consistent information on the level of occupant protection provided by vehicles in serious front and side crashes.
